

## Regasification capacity auctions for Service Year 2025

Hamina LNG holds monthly regasification capacity auctions for Service Year 2025 (October 2024 – December 2025) regularly at the end of the previous month. The Auctioned Capacity is 6000 Slots (MWh/d) of regasification capacity, unless otherwise announced in accordance with the Terminal Rules. The terms of the auction are described in section 36.2. of the valid Terminal Rules.

### Auction Schedules

Times in Eastern European Time / Eastern European Summer Time

Service period	Bidding period starts	Initial bidding period ends / additional bidding rounds start	Final auction close
October 2024	24.9.2024	26.9.2024 12:00	30.9.2024 12:00
November 2024	25.10.2024	29.10.2024 12:00	31.10.2024 12:00
December 2024	25.11.2024	27.11.2024 12:00	29.11.2024 12:00
January 2025	19.12.2024	23.12.2024 12:00	31.12.2024 12:00
February 2025	27.1.2025	29.1.2025 12:00	31.1.2025 12:00
March 2025	24.2.2025	26.2.2025 12:00	28.2.2025 12:00
April 2025	25.3.2025	27.3.2025 12:00	31.3.2025 12:00
May 2025	24.4.2025	28.4.2025 12:00	30.4.2025 12:00
June 2025	23.5.2025	27.5.2025 12:00	30.5.2025 12:00
July 2025	24.6.2025	26.6.2025 12:00	30.6.2025 12:00
August 2025	25.7.2025	29.7.2025 12:00	31.7.2025 12:00
September 2025	25.8.2025	27.8.2025 12:00	29.8.2025 12:00
October 2025	24.9.2025	26.9.2025 12:00	30.9.2025 12:00
November 2025	27.10.2025	29.10.2025 12:00	31.10.2025 12:00
December 2025	24.11.2025	26.11.2025 12:00	28.11.2025 12:00

The auction process is as follows:

- a) Auction start: Auction starts on the day indicated in the Auction Schedules above. If the Auctioned Capacity is different than 6000 Slots (MWh/d) of regasification capacity, the Operator will announce the amount on Hamina LNG website.
- b) Initial bid submission: The participants deliver initial binding bids, indicating the desired number of Slots and the bid price per Slot. Bids are sent via email to [info@haminalng.fi](mailto:info@haminalng.fi).

**If the total bids exceed the total auctioned capacity by the time indicated in the column “Initial bidding period ends”, an additional bidding round will be held. Bidders will be informed of additional bidding rounds via email.**

**If the total bids do not exceed the total auctioned capacity by the time indicated in the column “Initial bidding period ends”, the initial bids will remain in force.**

- c) Auction close: At the end of the initial bidding period, the total bids for capacity are tallied. If the total bids do not exceed the Auctioned Capacity, the capacity is fully allocated to the participants based on their bid amounts. Otherwise, additional bidding rounds are started.
- d) Additional bidding rounds: If the total bids for capacity exceed the Auctioned Capacity, additional bidding rounds are held. A maximum of three total bidding rounds are held and the schedule will be informed to the participants.
- e) Final auction close: When the final round of bidding is complete, the total bids for capacity are tallied. The highest bidders are prioritized and allocated capacity in descending order of their bid amount until the Auctioned Capacity is fully allocated. For bids that are equal in price, the earliest bid submitted is given priority. Participants are informed of their final allocated capacity and the corresponding final bid price per unit of capacity.
